OBJECTIVE

Passionate software developer excited to embark on a journey in web development. Armed with strong frontend skills and a hunger to master backend development. Seeking an entry-level role to apply frontend expertise, embrace backend challenges, and contribute to innovative projects in a dynamic and supportive environment.

PROJECT - Flashy Cabs [Cab-Booking Web App]

Full-stack **MERN** web application integrating Leaflet for maps and Clerk for authentication.

Seamless booking flow with dynamic car availability and automated email notifications.

Technologies Used:

Frontend: React.js, SCSS

Backend: Node.js, Express.js, MongoDB

APIs: Leaflet, Clerk

ACHIEVEMENTS

Web Development:

Awarded 1st prize in web development competition at St. Xavier College (XPASO'24), proficient in Bootstrap.

Game Development:

Developed three standalone mini-games showcasing proficiency in Unity Game Engine with C#.

Successfully participated in two game jams, publishing games on itch.io with positive community feedback.

Debugging Competitions:

Active participation in 5 competitions, showcasing adept problem-solving skills.

Secured victories in 3 competitions, demonstrating consistent proficiency in software bug identification and resolution.

TECHNICAL SKILLS

Programming Languages: C++, JavaScript.

Frontend: React JS, HTML, CSS, SCSS.

Backend: Node.js, Express.js.

Frameworks: Bootstrap 5, Tailwind CSS.

Database: MongoDB, MySQL.

Version Control: Git & GitHub.

Design Tools: Photoshop, Figma.
